

A highlighter that produces a clean finish with low bleed-through on notebooks and print papers.

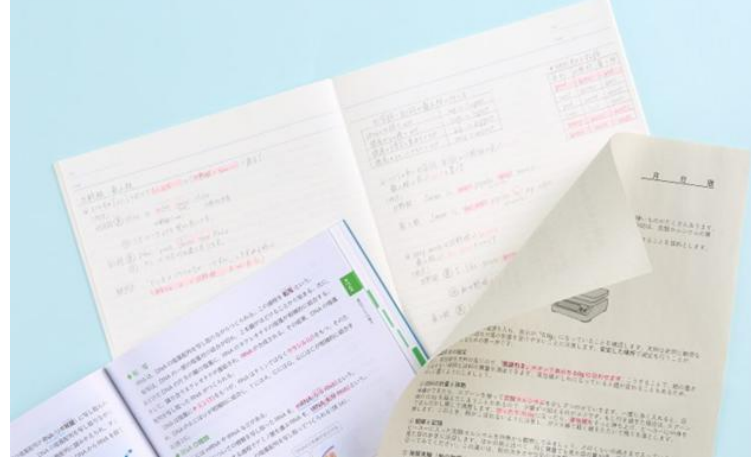

## Ink features

KOKUYO's proprietary hollow fine-particle ink achieves low bleed-through on thin paper such as notebooks, print papers, and dictionaries, providing a clean finish. The ink is also designed to resist smudging at the end of each stroke.

\*1 "Clean finish" means low bleed-through of the marker ink, so the marker color doesn't interfere with text on the reverse side, making it easier to read.

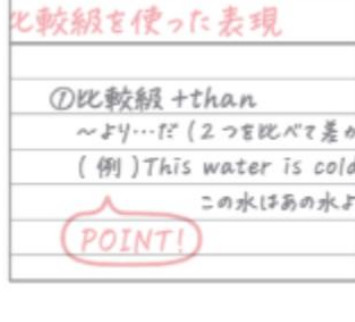

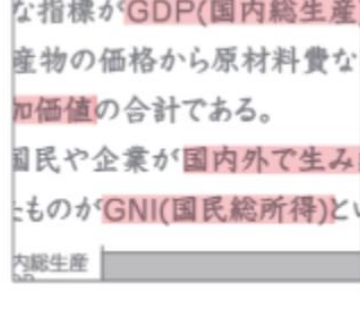

\*2 Survey conducted by KOKUYO in 2025 (research using Japanese dictionaries).

## Two types available

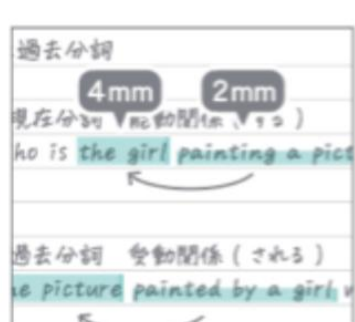

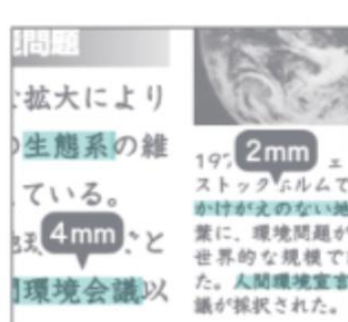

### ① Twin type with 4 mm width and fine tip:

The pen features two different marker tips for versatile use: a 4 mm wide tip ideal for highlighting important points, and a fine tip that can be used for illustrations and titles.

### ② Twin type with 4 mm and 2 mm width:

With two different marker tips, you can use them depending on your study purpose. The 4 mm tip is just right for marking important points, while the 2 mm tip is less likely to stray outside small text in textbooks and references. By using two tip widths, you can vary line thickness according to importance, helping you organize key points.

## A wide variety of colors

Available in three color types, with a total of 15 colors: vivid neon colors, softly pale pastel colors, and calm smoky colors. Ideal for highlighting textbooks and notebooks, they are also great for decorating planners, journals, and more.

### NEON

### SOFT

### SMOKY

## Precautions

- Do not use for purposes other than writing and drawing.
- Keep out of reach of infants.
- Do not shake vigorously or subject to impact such as dropping, as this may cause ink leakage.
- Do not store in direct sunlight or in places that may become hot.
- Be sure to close the cap and store horizontally after use.
- Dispose of properly in accordance with the material labeling and local waste-sorting rules.
